ABOUT THE WORKSHOP

The **15th International Workshop on HIV & Pediatrics** is taking place on 21-22 July 2023 in Brisbane, Australia in a hybrid format - just prior to the IAS 2023 Conference.

We are delighted to invite you to celebrate this special edition of the workshop by joining us live in person or virtually.

The 2-day program includes oral abstract and poster presentations, state-of-the-art lectures, and more informal, exciting and interactive fora - including case presentations, debates, and panel discussions.

The workshop is the only international workshop entirely devoted to research in prevention and treatment of HIV-1 in infants, children, and adolescents - making it the premier forum for the world's leading researchers.

The workshop brings together junior and senior investigators across a wide range of disciplines to share experience across the critical content areas - including HIV treatment and management, drug development, prevention of vertical transmission, co-infections and co-morbidities, pediatric cure research and implementation science.

The program will include lectures on:

- Global Update on Pediatrics HIV
- Pediatrics Care and Treatment
- Comorbidities / Co-Infections
- Treatment and Prevention of MDR/ XDR TB in Children
- Epidemiology of Pediatric, Adolescent and Maternal HIV in the Asia-Pacific

An **expository** and **knowledge-rich workshop** that **every healthcare worker** involved in the **management of Pediatrics** should look forward to attending. ”

Fantastic meeting with very **valuable information** and an **excellent networking opportunity**. An **excellently organized workshop!** ”

REGISTER TODAY

You can register now for HIV & Pediatrics 2023 and join us in this invaluable discussion among world-leading experts in the field.

Do not miss the opportunity to take part in this international workshop and learn more about present-day issues related to the prevention and treatment of HIV-1 in infants, children, and adolescents.
